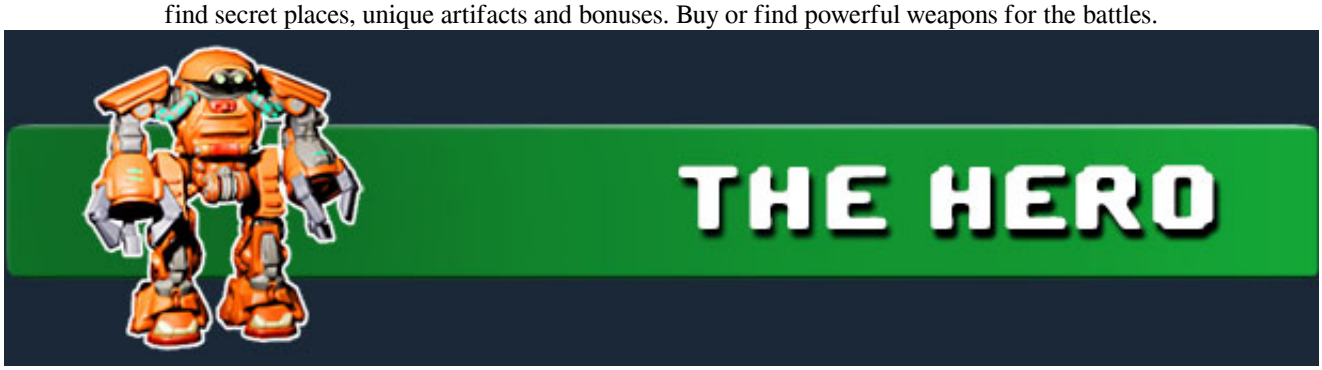
About This Game

TERRARIUM LAND is a 3D action-adventure arcade game with some logical puzzles.
A spaceship carrying robot T.I.X. crashes. Adventures and fight with mechanical enemies named "cybozoorgs" now start in the Terrarium Land world.
To preserve the nature on the planet, solve the puzzles and destroy enemies on different levels. Do explore the world`s levels, find secret places, unique artifacts and bonuses. Buy or find powerful weapons for the battles.



Robot T.I.X. is the main hero of the game. It is an experimental intelligent spy-cyborobot with different kinds of capabilities. The robot can generate a magnetic field to interact with the environment, transfer and scan objects. To battle with enemies, T.I.X. also uses various bombs and firearms. It uses special equipment to pass levels.
Health and energy are the parameters of the robot. Health is reduced by wounds and increased by bonuses. Energy decreases during runs, jumps and operation of the magnetic field generator but it is recovered during inaction.

Typically, **levels** in the game are small and medium-sized arenas with traps, enemies and logical puzzles. To complete a level and continue the adventure, you need to perform a number of specific tasks. The tasks are varied and include search and explorations, missions to annihilate and destroy, tasks to collect artifacts, and much more.

Dont be fooled by the nice graphics and cool trailers it sucks thats what i would say
the sound effects are really bad the main menu is such a just rushed through thing and
the controls are just the worst you have to hold down R and move long distances with wasd at the same time
look try it now pretending and you move so slow. press this to speed up it says but it makes no difference. i would no reccomend this game.. Dont be fooled by the nice graphics and cool trailers it sucks thats what i would say
